

DRIVING ELECTRIC 101

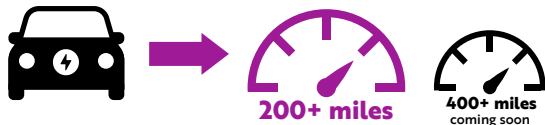

Find more facts about going electric at ElectricForAll.org.

FACT: The upfront cost of electric vehicles (EVs) is steadily growing more affordable and competitive.

In addition, EVs offer lower fuel and maintenance costs, which saves you more money overall.

FACT: Most all-electric vehicles now have 200+ mile ranges, with 400+ mile range EV models coming soon.

By charging up at home and at work, it's likely that you'll rarely need to charge at a public charging station. And, if you ever do, public fast chargers can recharge an EV in roughly 30 minutes!

FACT: From factory-to-road, electric vehicles (EVs) emit only a fraction of pollution that gas-powered vehicles do.

Plus, as the electrical grid transitions away from fossil fuels, EVs become even greener!

FACT: Over 80 EV models are currently available in California with automakers debuting more models each year.

Swing by ElectricForAll.org to find the EV for you!
